

Chester Cathedral is hosting a screening of the People's Emergency Briefing (<https://chestercathedral.com/events/event/peoples-emergency-briefing>). Free and open to all (age rating 16+) on 24 September 2026 in the South Transept of the Cathedral, from 7pm to 9pm (including discussion).

This is a new film from the National Emergency Briefing - a public information initiative to ensure the UK is fully briefed on the climate and nature crisis. The UK faces a growing climate and nature emergency. Yet most people have never been fully briefed on what it means for our lives, our economy and our future. It presents the national implications of climate and nature breakdown - along with credible, positive responses - in a single, accessible account designed for screening in communities across the UK, and has sections by various scientific experts in different fields giving their predictions of how different aspects of life will be affected, and reactions from celebrities and public as they watch the film.

MPs are invited to every screening to hear the evidence alongside their constituents. The film is intended as a catalyst for a wider public conversation and a stepping stone towards a live televised national briefing, introduced by the Prime Minister and delivered by independent experts, so that the whole country can be fully informed about the risks we face and the solutions available.

The screening will be followed by a discussion held by Climate Psychology Alliance trained facilitators.

Several of the congregation have already watched the film - Mike Jones, Liz Mills, Nicola Bos, so do please ask them about it. I would urge everyone to attend a screening so you are more aware of the scientific predictions for climate change and how they will affect your lifestyle in the near future.

Mike Jones
